

step into the future

New Lightbox Guide
Lumina RGB

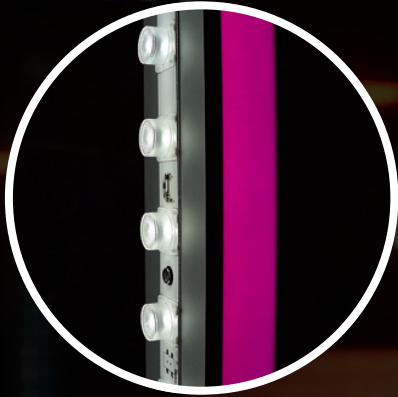

The new future of the art of advertising

New Lightbox Lumina RGB is a groundbreaking innovation in the offline advertising market, redefining visual presentation standards. As the first and only system of its kind, it integrates RGB technology directly into the frame, combining the EDGE LED illumination of the lightbox graphics with dynamic RGB effects.

This unique design unlocks entirely new lighting possibilities, offering multicolored effects ranging from subtle color transitions to spectacular pulsations. These effects can be fully customized and saved as permanent settings, ensuring every event, booth, or campaign stands out with a distinctive, futuristic appeal.

What's special?

Dual lighting

Edge LED lighting and LED RGB frame for maximum visibility.

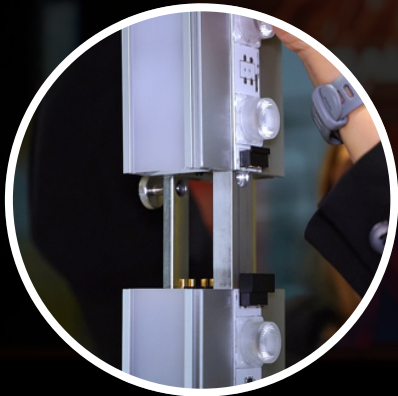

Programmable RGB frame

Prepare your favourite setup with dedicated remote control

Optional leaflet holders

Perfect accessory to hold your additional materials

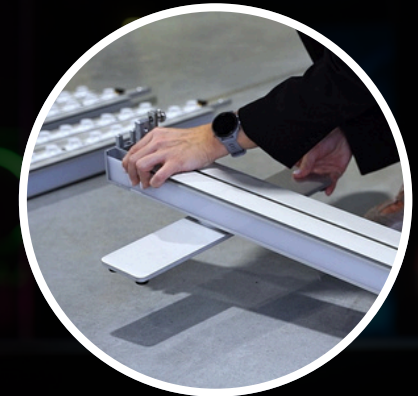

Wireless Light-Link connectors

Faster and easier assembly.

Two sided, reusable prints

You can use one or two prints on both sides, and switch them whenever you like.

Stable full-aluminium feet

These feet make the product more stable.
